PROFESSIONAL SUMMARY

Entry-level AI/ML Engineer and 2025 B.Tech graduate with project experience in NLP text classification, computer vision and AI workflow tooling. Built a cyberbullying detection model with TF-IDF and scikit-learn during the Infosys Springboard internship, and worked on data cleaning and quality as an AI Data Quality Analyst Intern at Rooman Technologies. Familiar with the full flow from data preprocessing and feature extraction to model evaluation and serving results through FastAPI.

TECHNICAL SKILLS

Machine Learning: Supervised and unsupervised learning, classification, regression, feature engineering, train/test split, cross-validation, hyperparameter tuning

Model Evaluation: Accuracy, precision, recall, F1-score, confusion matrix, overfitting and underfitting

NLP: Text preprocessing, tokenization, stop-word removal, stemming and lemmatization, TF-IDF, text classification, NLTK

Libraries: scikit-learn, pandas, NumPy, Matplotlib, Seaborn, OpenCV, TensorFlow/Keras and PyTorch (fundamentals)

Deep Learning and GenAI: Neural network fundamentals, CNN basics, Generative AI, LLM and RAG concepts, Prompt Engineering

Programming and APIs: Python, SQL, JavaScript, Java (fundamentals), FastAPI, REST APIs, JSON

Data and Tools: MySQL, Power BI, Jupyter Notebook, Git, GitHub, Docker (basics), VS Code, PyCharm

PROJECTS

Cyberbullying Detection System | Python, NLP, scikit-learn, NLTK, TF-IDF

- Developed an NLP model that classifies social-media text for cyberbullying content.
- Applied text preprocessing and TF-IDF feature extraction, then tuned the classifier to improve accuracy.
- Evaluated results using precision, recall and F1-score.

AI Face Recognition Attendance System | Python, OpenCV

- Built a computer-vision project that detects and recognizes faces and records attendance with timestamps.

Visual AI Pipeline Builder | React, React Flow, Zustand, FastAPI, Python

- Built a drag-and-drop builder for designing and connecting AI and Generative AI workflow pipelines.
- Developed a FastAPI backend that validates pipelines as Directed Acyclic Graphs (DAG) and exposes metrics via REST APIs.

Job Portal Application | React, Spring Boot, MySQL

- Built a full-stack job portal with registration, login, job listings and application tracking.

INTERNSHIPS AND TRAINING

AI Data Quality Analyst Intern | Rooman Technologies | Feb 2025 – May 2025

- Cleaned, transformed and validated raw datasets using Python and SQL to improve data quality for analysis.
- Built Power BI dashboards for business teams and optimized SQL queries, cutting data retrieval time by 35%.

Infosys Springboard Internship 5.0 | Infosys | Oct 2024 – Dec 2024

- Built a Cyberbullying Detection System using NLP and Python for social-media content analysis.
- Improved text classification accuracy through data preprocessing and model fine-tuning.

Java Full Stack Master Program | Besant Technologies | Aug 2025 – Jan 2026

- Trained in Java, Spring Boot, React and MySQL; built RESTful web applications.

EDUCATION

B.Tech, Electronics and Communication Engineering | 80% | Anantha Lakshmi Institute of Technology and Sciences, Anantapuram | Dec 2021 – May 2025

Intermediate | 80% | Narayana Junior College, Anantapur | Jun 2019 – May 2021

SSC | 93% | SRK Vidyalayam High School, Anantapur | Apr 2019

CERTIFICATIONS AND ACHIEVEMENTS

- IBM Front-End Professional Certificate (IBM); Generative AI for Software Developers Specialization (IBM)
- Generative AI for Data Analysts Specialization (IBM); Prompt Engineering Specialization (Vanderbilt University)
- 3-Star Badge on HackerRank; Best Student of the Year Award, Chinmaya Mission
