PROJECTS

Job Portal Application | MySQL, Spring Boot, Spring Data JPA, React

- Designed the MySQL schema for users, job postings and applications with primary and foreign key relationships.
- Implemented CRUD operations and application tracking through REST APIs backed by MySQL.
- Wrote SQL queries to verify stored data during development and testing.

Cyberbullying Detection System | Python, pandas, scikit-learn, NLTK

- Cleaned and preprocessed social-media text data before TF-IDF feature extraction and classification.

Visual AI Pipeline Builder | FastAPI, Python, React

- Built a FastAPI backend that validates workflow data as Directed Acyclic Graphs (DAG) and returns node and edge metrics as JSON.
