## PROJECTS

**Job Portal Application** | Spring Boot, React, MySQL, Docker, Docker Compose
- Developed and deployed a full-stack job portal with registration, login, job posting and application tracking.
- Containerized the Spring Boot API, React front end and MySQL database as separate services run together with Docker Compose.
- Built REST APIs following MVC and microservice principles and managed source code with Git and GitHub.

**Visual AI Pipeline Builder** | React, FastAPI, Python, Docker
- Built a drag-and-drop AI workflow builder with a React front end and a FastAPI backend service.
- Developed APIs that validate pipelines as Directed Acyclic Graphs (DAG) and expose node and edge metrics.

**Cyberbullying Detection System** | Python, NLP, scikit-learn
- Built a Python NLP pipeline to classify social-media text, with preprocessing and model tuning.

## INTERNSHIPS AND TRAINING
