PROFESSIONAL SUMMARY

Entry-level Generative AI Developer and 2025 B.Tech graduate holding three Generative AI and Prompt Engineering specializations from IBM and Vanderbilt University. Built a Visual AI Pipeline Builder, a drag-and-drop tool for designing Generative AI workflows with a FastAPI backend, and an NLP text classification system during the Infosys Springboard internship. Combines Python and full-stack skills to turn LLM ideas into usable applications.

TECHNICAL SKILLS

Generative AI: Large Language Models (LLMs), Prompt Engineering, few-shot and chain-of-thought prompting, Retrieval-Augmented Generation (RAG) concepts, AI agents (concepts)

LLM Tooling: LangChain (fundamentals), Hugging Face Transformers (basics), LLM APIs, embeddings and vector databases such as FAISS and ChromaDB (concepts)

NLP and ML: Text preprocessing, tokenization, TF-IDF, text classification, scikit-learn, NLTK, model evaluation (precision, recall, F1-score)

Backend and APIs: Python, FastAPI, REST APIs, JSON, Pydantic, API integration, Postman

Frontend: React.js, React Flow, Zustand, JavaScript (ES6+), HTML5, CSS3

Data: pandas, NumPy, SQL, MySQL, Power BI, Jupyter Notebook

Tools: Git, GitHub, Docker (basics), VS Code, PyCharm, Agile

PROJECTS

Visual AI Pipeline Builder | React, React Flow, Zustand, FastAPI, Python

- Built a drag-and-drop Generative AI workflow builder that lets users design and connect pipeline nodes with zero coding.
- Implemented real-time state management and interactive node and edge handling using React Flow and Zustand.
- Developed a FastAPI backend that validates pipelines as Directed Acyclic Graphs (DAG) and exposes node and edge metrics via REST APIs.

Cyberbullying Detection System | Python, NLP, scikit-learn, NLTK, TF-IDF

- Developed an NLP system that classifies social-media text for cyberbullying content.
- Applied text preprocessing and TF-IDF feature extraction; evaluated models using precision, recall and F1-score.

AI Face Recognition Attendance System | Python, OpenCV

- Built a face detection and recognition project that records attendance with timestamps.

INTERNSHIPS AND TRAINING

Infosys Springboard Internship 5.0 | Infosys | Oct 2024 – Dec 2024

- Built a Cyberbullying Detection System using NLP and Python for social-media content analysis.
- Improved text classification accuracy through data preprocessing and model fine-tuning.

AI Data Quality Analyst Intern | Rooman Technologies | Feb 2025 – May 2025

- Cleaned, transformed and validated raw datasets using Python and SQL to prepare quality data for AI use cases.
- Built Power BI dashboards and optimized SQL queries, cutting data retrieval time by 35%.

Java Full Stack Master Program | Besant Technologies | Aug 2025 – Jan 2026

- Trained in Java, Spring Boot, React and MySQL; built RESTful web applications.

EDUCATION

B.Tech, Electronics and Communication Engineering | 80% | Anantha Lakshmi Institute of Technology and Sciences, Anantapuram | Dec 2021 – May 2025

Intermediate | 80% | Narayana Junior College, Anantapur | Jun 2019 – May 2021

SSC | 93% | SRK Vidyalayam High School, Anantapur | Apr 2019

CERTIFICATIONS AND ACHIEVEMENTS

- IBM Front-End Professional Certificate (IBM); Generative AI for Software Developers Specialization (IBM)
- Generative AI for Data Analysts Specialization (IBM); Prompt Engineering Specialization (Vanderbilt University)
- 3-Star Badge on HackerRank; Best Student of the Year Award, Chinmaya Mission
